Fare zones = generations

0	**Origin**
1	**Primordials**
2	**Primordial children**
3	**Titans and contemporaries**
4	**Olympians and younger Titans**
5	**Olympian children and contemporaries**

Reading the map

Station: a figure on one line

Interchange: a line starts or joins

Consecutive stops on a line are parent and child. Where two parents' lines arrive side by side, the station is their child: Ares and Hebe are children of Zeus and Hera. The zones are the generations. An interchange is where a new line begins, or where lines come together. Only the lineages above are drawn; the full genealogy has 79 figures.
